Scott Boening

Junior Software Developer

👤 Profile

A highly driven and organized bilingual Junior Fullstack Software Developer with 10+ years of professional experience as a Graduate Psychologist. Passionate about Backend Development and Testing, skilled in HTML, CSS, JavaScript, Python, and Django. Currently learning React and Docker.

📊 Project Experience

4th Milestone Project ‚scifi_zone': Full Stack ecommerce project

- Using Django, Bulma and Stripe, I developed an app about a fictional sci-fi themed convention that allows users to buy various types of tickets
- Implemented search across multiple models using Django-Watson
- For more details, please refer to my Github repo.

📊 Relevant Technical Experience

Channel Lead for „Interactive Frontend" (2nd Milestone Project)

- Held 2 webinars about best practices in Git and handling API responses
- Answered JavaScript related questions from students in Slack
- Helped individual students with problems in their milestone projects via Slack calls

Hackathon participation

- Won 1 hackathon, participated in another hackathon, and was a „hackathon facilitator" for a third hackathon

Community content creator

- Wrote an article about the differences between Java and JavaScript for the Code Institute blog
- Published articles: a Python cheat sheet and an article about relational databases
- Articles to be published: HTML Head Tag, HTML Body Tag, and How to add Images in HTML

💼 Employment History

Psychologist at Klinik Angermühle, Deggendorf, DE

March 2015 — Present

- Diagnosis and treatment of sleep disorders
- Educate patients about sleep disorders
- Write medical reports

Psychologist at MPU Beratung BW, Plochingen, DE

June 2011 — February 2015

- Help clients understand the behaviour that led to the loss of their driver's license and worked with them on strategies to change this behaviour
- Prepared clients for their Medical-psychological assessment
- Train + supervise Medical-psychological assessment advisors

Unemployed

September 2010 — May 2011
